

Black Bear

Water Base Acrylic Wood Stain

Weathered Brown

Use **Black Bear Water Base Acrylic Wood Stain** to stain a lot of basswood easily and quickly. The resulting finish is a "walnut" brown.

Preparation: Stir and shake well. Keep stirred during use so particles don't settle out of solution.

Conventional Application: Apply stain liberally and wipe off excess. Let dry.

Laser Cut or Delicate Parts: Dilute stain two (2) parts water to one (1) part stain. Dip or apply liberally. Shake off excess. Let dry.

Bulk Application: Gives wood a lighter finish with a touch of weathered gray. Cover wood with undiluted stain. Let stand for 3 minutes. Rinse thoroughly with tap water. Let dry.

Drying: Scatter parts on a piece of scrap carpet. Parts will not stick to carpet lint or to each other.
